

Cantol

**Industrial
& Specialty
CHEMICALS**

We believe that Cantol is not just another specialty chemical company, it is a very special company. Our products are manufactured in the highest concentrations possible, formulated and designed specially for the industrial and institutional fields. Our goal is to manufacture and distribute products of the highest quality that do not vary in consistency, application or results. Over the years Cantol has purchased specialty chemical companies in Canada and the United States.

Each purchase brought new products, formulations, experience and research. Some of these purchased companies had been in business over 60 years. These companies built their businesses around a few unique products which are all available today from Cantol. Through a combination of research and acquisition, we have been successful in putting together a specialty chemical line of quality, unique products; a combination of the best of many companies.

We take pride in our products setting the highest standards in our industry. Over 15 years ago, Cantol was a leader for the introduction of Environmentally Responsible product lines to better serve our customers and protect the environment. Technology and experience forms the basis of the training of our management and sales personnel, training which never stops to better serve our customers in the institutional, municipal and industrial fields.

Industrial and Specialty Chemicals

ENVIRONMENTALLY RESPONSIBLE PRODUCTS

We at Cantol are committed to contributing to a Safer, Cleaner, Healthier Environment. All product information labels, cartons and data sheets are printed on or packaged in recycled paper wherever possible. The products described in this catalog meet environmentally responsible standards. Products that meet or exceed the government standards for Environmentally Responsible Products are highlighted in green. Our Research and Development Department will continue to work diligently at providing you with the most up-to-date products and information. If you have any questions, please contact your Cantol Representative for additional information.

Industrial and Specialty Chemicals

INDUSTRIAL AND INSTITUTIONAL CLEANERS

LIQUIDS

BELIEVE! – No Rinse Stripper for Floors

A powerful product designed to strip even the hardest thermoplastic, burnished or metal cross-link floor finishes in half the procedure time of ordinary strippers with half the effort. The fast acting, penetrating liquid is non-ammoniated, low foaming and allows you to properly prepare your floor for recoating with floor finish with no machine, no scrubbing pads, no neutralizers, no long down time and no floor rinsing. Agr. Can. Approved.

DAVOL – Liquid Steam Cleaner

A heavy duty nonflammable, biodegradable, fast acting liquid whose cleaning power is released through steam. DAVOL penetrates and emulsifies grease, oil and dirt from all types of equipment and parts. DAVOL will not corrode or clog steam cleaning equipment. USDA, Agr. Can. Approved.

DO-IT – Ready-to-use Multi-Purpose Cleaner

A ready to use liquid multi-purpose spray cleaner incorporating Cantol's exclusive solvent emulsion system that combines the penetrating and soil suspending properties of detergent cleaning with the degreasing ability of safe solvents. Spray on, wipe off. No rinsing is required. DO IT cleans fast and efficiently on contact leaving a mild, pleasant citrus bouquet fragrance. Nonflammable and harmless to all washable surfaces. USDA, Agr. Can. Approved.

EF-90 – Biodegradable Heavy Duty Multipurpose Cleaner and Degreaser

A highly concentrated, heavy duty degreaser and cleaner which contains no solvents. The environmentally friendly formulation is without phosphates and is completely biodegradable. EF-90 is nonflammable, easily rinsed and safe on all surfaces when used according to directions. Quickly lifts oil, grease and other soils from metal and other hard and soft surfaces. USDA, Agr. Can. Approved.

HEX – Cleaner and Deodorizer for Overcoming Odour Causing Bacteria

A concentrated blend of synthetic detergents, quaternary ammonium compounds and deodorizing agents. HEX cleans and deodorizes in one operation. Leaves a fresh pleasant aroma. This double action product was specially designed to remove grease, slime, dirt, sludge and fat while overcoming odour-causing bacteria at the source. Regular use of HEX will keep the area clean and fresh. USDA, Agr. Can. Approved, DIN.

KOIL KLEEN – Foaming Cooling Coil Cleaner

KOIL KLEEN is a cleaner and degreaser for air conditioning coils. Adhering foam lifts grime and oil from normally inaccessible places. Dirt and lint washes away with condensation. No rinsing required. KOIL KLEEN eliminates the need for high pressure sprayers or bulky tank sprayers. Formulated with a special combination of strong, biodegradable, nonacid cleaners for fast, convenient, easy to use, nonmessy application. Cleaning action begins immediately and residual cleaning agents help to maintain coils as condensation occurs. USDA, Agr. Can. Approved.

LO-FOAM – Cleaner for Automatic Scrubbing Machines

A scientifically formulated cleaner designed for use in automatic floor scrubbing machines where a controlled foam level is important to the efficiency of the machine. LO-FOAM contains special solvents and coupling agents to dissolve and emulsify dirt, grease, and oil. Effective in hot or cold, soft or hard water conditions, and can be used safely on all floors. USDA, Agr. Can. Approved.

NO SPOT – Liquid Vehicle Wash

A concentrated liquid vehicle wash formulated to penetrate and remove road film, grease, oil, bugs, sludge, gas stains and other accumulated soil and grime. The quick sudsing action of NO SPOT generates a blanket of foam that holds dirt in suspension until rinsed away. Surfaces are left clean and bright. NO SPOT's effective ingredients combine to give a high dilution for greater economy and streak-free cleaning action that is safe on all finishes: chrome, rubber, glass and metal including aluminum.

NONCORR – Acid Replacement Cleaner

NONCORR is a non-corrosive, non-fuming, biodegradable cleaner containing a low pH organic salt that acts like an acid but without the safety concerns found in traditional acid cleaners. **NONCORR** is classified as a mild skin irritant. Thus providing significant safety, handling, labeling and shipping advantages. Both the US Department of Transportation (DOT) and Transport Dangerous Goods (TDG) of Canada do not regulate **NONCORR**. In traditional acid cleaners two of the most commonly used toxic substances are hydrochloric acid and phosphoric acid. **NONCORR** is proven to be an effective replacement for these, and many other acids, acid blends and organic acids. **NONCORR** provides fast removal of calcium, lime, rust, and other deposits typically found on metal surfaces today. **NONCORR** is a detergent rich formulation that clings to the surface while providing effective soil removal at an economical cost.

NOVA-ALERT – Three-In-One Enzyme Treatment

A ready-to-use surface cleaner, deodorizer and drain maintainer combined in one easy-to-use product. Removes hard water stains, uric acid, grime and other common restroom soils. Apple orchard fragrance leaves restrooms smelling clean and fresh. When rinsed down drains, added enzymes help break down organic waste from drains and pipe walls. In addition, enzymes help eliminate bad odours caused by urine and feces. This fortified feature of NOVA-ALERT is specially suited for areas with young children or older adults. Helps eliminate the trouble odour between scheduled cleaning. The trigger sprayer bottle produces a light foam that cuts through filmy residues which are then easily wiped away. Multi-functional NOVA-ALERT is 100% biodegradable and environmentally responsible. USDA.

ORA-SOLV FOAM – Water Soluble, Biodegradable Cleaner and Degreaser

A heavy duty, water soluble cleaner and degreaser formulated with efficient, biodegradable solvents, one of which is a natural, active solvent whose orange grove aroma enhances the work area. The solvent system uses no petroleum distillates or chlorinated solvents. ORA-SOLV FOAM contains powerful penetrating and emulsifying agents which fortify the solvent action. The environmentally compatible ingredients soften, liquefy and suspend the toughest soils for fast and easy removal by water rinsing. ORA-SOLV FOAM requires no special handling and is easily disposed of in the same way as any neutral water based cleaner. USDA, Agr. Can. Approved.

PINE ODOUR – Liquid Cleaner and Deodorant

PINE ODOUR is a quaternary ("Quat") cleaner and deodorant containing pine oil. The versatile liquid is designed to clean and deodorize in one labor saving operation. **PINE ODOUR** deodorizes at the source with a powerful quaternary compound while leaving a pleasant and fragrant odour of pine which is noticeable for several hours after use. **PINE ODOUR** achieves excellent cleaning effectiveness through the use of a powerful detergent, "Quat" and pine oil. Dirt is held in suspension until rinsed away. Use **PINE ODOUR** to effectively control odours and freshen the air while cleaning.

SAFE 'N GREEN – Multi-Purpose Cleaner For All Environments

SAFE 'N GREEN quickly attacks, lifts and destroys grease, oil and other stubborn soils from all washable surfaces and is safe to use in hypersensitive environments. **SAFE 'N GREEN's** unique formulation uses new surfactant technology that provides enhanced cleaning performance without solvents, phenols, or other toxic hazards. Superior penetration and removal of soils gives **SAFE 'N GREEN** the ability to work in areas where agitation may be restricted. Just spray on, wipe, hose or sponge off! The readily biodegradable formulation outperforms traditional NPE (Nonylphenol Ethoxylates)/ Glycol ether systems. The absence of solvent means no VOC concerns. **SAFE 'N GREEN** is non-sensitizing, non-irritating, non-toxic, non-flammable and contains no allergens. This outstanding environmental profile means **SAFE 'N GREEN** can be used where sensitivity is an issue.

SEE KLEER – Glass & Mirror Cleaner

A highly concentrated liquid product formulated to chemically clean all types of institutional and industrial glass, mirrors and related surfaces. A single application leaves a bright clean surface without streaking or smearing. Pleasant to use. Leaves a mild fragrance after application. **SEE KLEER** dissolves and removes smudges, film, fingerprints, dirt, grease, grime and oil from glass and mirrors. Agr. Can. Approved.

TECH 736 – Heavy Duty Multi-Purpose Cleaner and Degreaser

A uniquely concentrated chemical formulation combining high quality detergents with the oil and grease cutting action of solvents. This solvent emulsion cleaning action enables **TECH 736** to outperform ordinary detergents by delivering the powerful grease cutting action of solvents, safely and economically. The multi-purpose cleaning power of **TECH 736** will remove the toughest stains, grease, oil, fat, carbon, wax and dirt without hard rubbing. **TECH 736** is non-flammable, easily rinsed and safe on all surfaces when used according to directions. USDA, Agr. Can. Approved.

THAT GREEN STUFF – Nonacid Cream Cleanser and Polish

An efficient, easy to use, non-acid cream cleanser and polish containing “jeweler’s rouge” that will not scratch, scour or pit surfaces. A ready to use formula to clean, polish, brighten and deodorize a wide variety of hard surfaces in one easy operation. **THAT GREEN STUFF** is thick so that it clings to vertical surfaces. It cuts through soil with super speed without the need for hard rubbing. The pleasant fragrance of **THAT GREEN STUFF** deodorizes as it cleans. USDA, Agr. Can. Approved.

VANTAGE – Water Soluble Cleaner and Degreaser

VANTAGE is a super powerful, water soluble multi-purpose formulation specially formulated with soil cutting ingredients to provide greater strength and cleaning power to attack the toughest grease, oil, dirt, carbon, wax, mildew, ink, soot, grime and other stubborn stains without heavy scrubbing. **VANTAGE's** unique cleaning action works through saponification and emulsification. **VANTAGE** reacts with grease and fat (saponification) to form water soluble soaps and chemically breaks up fats and oils (emulsification) thus allowing soil to be rinsed away after being dissolved in water. **VANTAGE** is effectively used as a complete all-purpose degreaser and cleaner for industrial and institutional equipment and machinery; also floors, walls and other hard surfaces. Use it in trigger sprayers, hand pressure sprayers, mop buckets and high pressure washers. **VANTAGE** contains no chlorinated solvents or petroleum distillate such as kerosene or naphtha.

POWDERS

MW-36 – Concrete Cleaning Powder

A powerful alkaline and solvent formulation with an emulsifying cleaning action which makes it extremely effective in removing oil and grease deposits from concrete.

POWER POWDER – Powdered Cleaner with Pine Oil

POWER POWDER has the dispersing action of a solvent; the emulsifying and penetrating action of soaps; and the soil suspending power of detergents. POWER POWDER is water soluble with 100% active cleaning force. POWER POWDER will effectively clean many types of soil, dirt, oil and grease and can be used on a wide variety of surfaces. It contains pine oil that deodorizes as it cleans. USDA, Agr. Can. Approved.

SCOW-X – Powdered Scouring Cleanser

A chemical blend of a noncorrosive acid, mild abrasive, detergent builder and penetrating agents designed to effectively remove stains, including rust, as well as imbedded dirt and other stubborn soil. SCOW-X is used where a mild abrasive action is needed. A noncorrosive acid helps to remove hard water deposits, restore surfaces and remove stains. Agr. Can. Approved.

STANEX – Pressure Wash Compound and Steam Cleaner

A noncorrosive heavy duty all purpose powdered concentrate especially designed for use in pressure washer systems and steam cleaners. STANEX contains a complex formulation of powerful soil cutting ingredients that remove grease, grime, oil, fats, dirt, carbon and mildew. STANEX chemically breaks up soil so it can be easily rinsed away. Controlled sudsing saves unnecessary rinsing. USDA, Agr. Can. Approved.

ACIDS

ACI-TECH – Multi-Purpose Acid Cleaner

A multi-purpose acid cleaner containing a blend of powerful acids combined with a solvent, penetrant and inhibitor to cover a wide variety of applications. ACI-TECH efficiently and economically removes rust, scale, hard water deposits, uric acid deposits, concrete, oily film, stains and discolorations from brick, stone, concrete, most metal, ceramic and quarry tiles, terrazzo and china-like (urinals and toilets) surfaces. It acts as an excellent chemical etch for concrete floors. Designed to be used in the areas of daily housekeeping to the heavy industrial user. USDA, Agr. Can. Approved.

TECH-110 – Aluminum/Stainless Steel Cleaner and Brightener

An acid cleaner chemically formulated to remove dirt, grime, oil, grease, stack carbon and dulling oxidation from aluminum and stainless steel. TECH 110 will help restore the brightness of aluminum and stainless steel. Used as directed, TECH 110 will not harm decals, printed lettering, vinyl coatings, enamel or lacquer, rubber, copper, chrome, nickel, or lead plate. Agr. Can. Approved.

TECH LA – Liquid Acid Cleaner

An odourless, low foaming liquid acid cleaner. The acid, emulsifier and penetrants work together for the rapid removal of milkstone, beerstone, hard water deposits, protein, scale, rust and dirt. The low foaming feature enables TECH-LA to be used in clean-in-place (CIP) systems; as well as with clean-out-of-place (COP) methods. TECH-LA attacks and disperses protein for good peptizing power. Mineral deposits are dissolved and held in suspension thus minimizing redeposition. Rust is chemically removed with TECH-LA without the need for aggressive fuming acids. USDA, Agr. Can. Approved.

AEROSOLS

EF-93 – Multi-surface Environmental Foam Cleaner

A heavy-duty, environmental aerosol foam cleaner and degreaser formulated with a biodegradable, natural active solvent where orange grove aroma enhances the work area. Cuts through the heaviest soil and grease build-up, including rust stains, lime deposits and soap residue found on tile and grout, without the need for harsh chemicals; tough on dirt and easy on you. Contains no petroleum distillates or chlorinated solvents and is non-corrosive and non-caustic.

GLASS & MIRROR – Cleaner for all Glass

Glass & Mirror Cleaner is specifically designed for economically cleaning glass and mirrors. Easily dissolves smudge, film, scum, smear, bugs and all other soil. The convenience of the aerosol enables the user to clean surfaces with no mess, spill or drips. The unique formulation of this product is dispensed upon the surface in liquid foam and immediately turns to foam. This foam will stay on the exact area that is sprayed and will not run down the surface causing streaks. Very little effort has to be used in wiping the surface, due to the fast drying agents contained in Glass & Mirror cleaner.

SOY-SOLV – Bio-based Cleaning Solvent

SOY-SOLV is a natural, industrial strength cleaning solvent made from 100% pure soybean oil. SOY-SOLV is a safe, plant derived, and therefore bio-based, solvent degreaser. The non-flammable aerosol is the perfect biodegradable solvent cleaning solution. SOY-SOLV leaves no residue when rinsed with water. No harsh odour or vapours. Quickly cleans industrial parts and equipment. SOY-SOLV contains no water, terpenes, citrus oil or petroleum solvent. Its cleaning power is derived from a renewable American-grown resource, soybeans. Its cleaning action penetrates, dissolves and lifts away grime and grease. The plastic safe formulation has controlled evaporation with extended contact time for increased cleaning power. Super low VOC's ensures a quality environment. SOY-SOLV is nonconductive and is safe for use on energized equipment. Choose the next generation of solvent cleaning that is safe and effective.

Cantol

Industrial and Specialty Chemicals

SPECIALTY PRODUCTS

BLANKET – Floating Degreaser and Deodorizer

Designed to help liquefy grease balls, grease matte and reduce grease build up on the surface, walls and float of sewage treatment vessels. In addition, powerful deodorizing agents help to overcome and control offensive odours associated with sewage treatment facilities. BLANKET moves up and down with the flow of sewage. BLANKET provides continuous deodorization by suppressing sulphide formations and neutralizing odours both in the air and at the source. Apply into pumping stations, wet wells, lift stations, holding tanks and other similar vessels.

CANTOL CEILING TILE SPRAY – Restores White Ceiling Tiles

Specially formulated to restore damaged ceiling tiles that have been affected by smoke, soil, water spotting or discoloration. The fast drying spray quickly restores tile with minimal cost, labor and down time. CANTOL CEILING TILE SPRAY covers smooth or rough surfaces without affecting acoustic property of the tile. Reconditions dull old tiles, while saving on tile replacement costs and enhancing the work environment.

CANTOL 624 PATCH – Asphalt Road and Pavement Repair

CANTOL 624 PATCH is the next generation technology of asphalt road and pavement repair. Not just for pothole applications, but also for permanent repairs to utility cuts and for paving through an asphalt spreader. **CANTOL 624 PATCH'S** revolutionary formula of blended asphalt, wetting agents and co-polymers are mixed with selected aggregates to produce this premium quality paving material with lower cost while maintaining the highest quality available today.

CANTOL CP770 – Aerosol Cold Pipe Condensation Inhibitor

CANTOL CP770 is a white aerosol insulating sealant that prevents condensation and sweating on cold water pipes, condensers, valves, and pipe fittings. Stops damage caused by dripping water. Can be painted over when dry. Provides an excellent repair for wrap-around insulation.

D'STROYER WIPES – Waterless Surface And Hand Cleaner

D'STROYER WIPES are two sided and have two functions. Both sides are used to clean surfaces and hands without water. One side is a non-scratching, abrasive, grime-busting texture to remove tough soils while the other provides smooth wiping. D'STROYER WIPES loosen, dissolve and destroy surface and embedded grease, grime and soil, which are then absorbed into the cleaning wipe. Surfaces are left fresh and clean while hands are conditioned with emollients. D'STROYER WIPES are portable, industrial strength, yet gentle to the skin, requiring no rinsing, no drying, and leave no residue. These citrus scented wipes are the perfect product when you don't have access to cleaners and water. Use the versatility of these dual-purpose wipes for almost any job – from hand cleaning to tools, to equipment, to wiping up spills and just about any surface. The portable "work station" contains 70 pre-moistened wipes that are safe and easy to use. No matter what the use, D'STROYER WIPES are the perfect solution.

ENVI/SORB – Lightweight, Biodegradable, Industrial Oil Absorbant For All Hydrocarbons

Absorbs cleanly and completely all hydrocarbons on contact from the surface of land and water. Hydrocarbons include oil-based liquids, fuel oil, aviation fuel, gasoline, motor oil, oil-based paints, crude oil, oil-based inks and vegetable oils. One pound of ENVI/SORB absorbs approximately one U.S. gallon (128 ounces) of oil. ENVI/SORB only soaks up the oil, it will not absorb water. Hydrocarbons are solidified for easy removal, transportation and disposal. Can be incinerated safely, with virtually no ash or residue being generated. A high absorbency means less product is required to clean up a spill, while less absorbant is hauled away. ENVI/SORB is a natural material that is biodegradable, nontoxic and the environmentally responsible choice.

FAST SET CONCRETE REPAIR – Pre-Mix One Component Patching Kit

Cantol's **Fast Set Concrete Repair** is a pre-mixed one component chemical action concrete patching product for holes and deep cracks in concrete. This specially designed product takes foot traffic in 15 minutes avoiding production delays. This ready to use self-curing patching product will harden to over 9800 psi in compressive strength. Use it for repairing freezers, floors, roads, ramps, sidewalks and industrial floors.

GAT – Removes Graffiti, Grease, Asphalt, Tar and other Stubborn Soils

A blend of powerful, biodegradable cleaning solvents. The thick, gel-type cleaner dissolves and removes graffiti, grease, asphalt, tar, oil, dirt, tire marks and other stubborn soils. Surfaces are cleaned without the need for chlorinated solvents or petroleum distillates. The longer GAT works, the more it cleans. GAT is water emulsifiable and easily flushed off, or it can be wiped off with a rag. The heavy duty, industrial strength product is the fastest, easiest and cleanest way to remove graffiti and degrease surfaces without the need for environmentally troublesome solvents. USDA.

GRIME FIGHTER – Invisible Skin Shield

A protective coating that acts like a glove to help guard workers hands. The film barrier helps protect skin against irritation. Formulated with silicone for wet work; lanolin for conditioning; moisturizing agents to help prevent dryness; and a bacteria fighting ingredient. Use before work to make clean up easier and at the end of the day to keep hands soft and conditioned.

HI-BRITE – Metal Finish Maintainer

A nonflammable, lemon scented emulsion formulation specially designed to clean, polish and protect the original finish of metal surfaces (stainless steel, aluminum, brass, chrome, copper) and other hard washable surfaces (Formica, plastics, porcelain). HI-BRITE easily removes, without abrasive agents, tough oil based stains, water spots, fingerprints, smudges, spills and food soils. HI-BRITE polishes as it cleans and leaves no greasy film. HI-BRITE contains all edible ingredients which enables it to be used anywhere with confidence. USDA, Agr. Can. Approved.

JUST PADS – Quick Absorbents For Oil Spills

Spills of all oil-based liquids will not have a chance to spread with the quick absorbent ability of JUST PADS. The absorbents used in JUST PADS are the latest technology available to contain oil spills whether hazardous or non-hazardous. Be prepared! Place several cartons in spill-prone areas. JUST PADS can pick up spills quickly and safely to help prevent environmental contamination. The powerful wicking action of JUST PADS is perfectly equipped to handle the spill or leak quickly and efficiently. Make JUST PADS part of your spill team.

JUST SOCKS – Quick Absorbents For Oil Spills

Spills of all oil-based liquids will not have a chance to spread with the quick absorbent ability of JUST SOCKS. The absorbents used in JUST SOCKS are the latest technology available to contain oil spills whether hazardous or non-hazardous. Be prepared! Place several cartons in spill-prone areas. JUST SOCKS can pick up spills quickly and safely to help prevent environmental contamination. The TWELVE (12) 4-foot (1.2 meter) socks soak up oil on contact while repelling water. They can be tied together to dike large or small areas. The powerful wicking action of JUST SOCKS is perfectly equipped to handle the spill or leak quickly and efficiently.

MELT AWAY – Ice and Snow Melting Flakes

A unique chemical compound in flake form that melts more ice and snow, works faster, at lower temperatures, for longer periods than rock salt. MELT AWAY is effective down to -59°F (-51°C) while rock salt is ineffective at 5°F (-15°C). MELT AWAY gives off heat to help dissolve ice and snow while rock salt must absorb heat which is difficult at below freezing temperatures. MELT AWAY leaves no unsightly messy residue and does not harm concrete, shrubs or grass. It is produced in flake form to cover a greater surface area and to lie flat when applied to inclined surfaces. USDA.

NONCORR – Acid Replacement Cleaner

NONCORR is a non-corrosive, non-fuming, biodegradable cleaner containing a low pH organic salt that acts like an acid but without the safety concerns found in traditional acid cleaners. NONCORR is classified as a mild skin irritant. Thus providing significant safety, handling, labeling and shipping advantages. Both the US Department of Transportation (DOT) and Transport Dangerous Goods (TDG) of Canada do not regulate NONCORR. In traditional acid cleaners two of the most commonly used toxic substances are hydrochloric acid and phosphoric acid. NONCORR is proven to be an effective replacement for these, and many other acids, acid blends and organic acids. NONCORR provides fast removal of calcium, lime, rust, and other deposits typically found on metal surfaces today. NONCORR is a detergent rich formulation that clings to the surface while providing effective soil removal at an economical cost.

STOP RUST! – Water-Based Rust Conversion Treatment

A one-step rust destroying treatment that stops old rust and coats iron or steel surfaces to prevent new rust. An easy-to-use liquid that contains rust neutralizing chemicals that combine with rust to convert it into a hard black polymer surface that offers long lasting protection as a weather-proof coating or as a superior under-coating. Minimal preparation requires a wire brush to remove only flaking rust, oil and grease. No need to remove all traces of rust. Warm water and detergent is used for easy clean up. USDA.

SOY SLIP – Biodegradable Asphalt Release Treatment

SOY-SLIP is a dilutable asphalt release treatment that solves the problem of asphalt mixtures sticking to truck beds during transport and use. **SOY-SLIP** is a non-petroleum based product that will not dissolve asphalt, as does diesel or kerosene. **SOY-SLIP** is easily prepared by mixing one part **SOY-SLIP** with 9 parts of water. The mixture can be applied by spray, brush or mop to truck beds. Once coated, reapplication may not be needed for several uses or loads. **SOY-SLIP** is non-hazardous, non-toxic, non-flammable and biodegradable. The soybean oil based product is economical and designed to be low foaming in spray systems. The user-friendly formulation is safe to use on painted and all metal surfaces while having no objectionable odour. By helping to prevent adhesion, **SOY-SLIP** makes clean up of asphalt from tools, equipment, steel drums and manhole covers easier. Use **SOY-SLIP** to eliminate personal and environmental hazards and realize significant cost and time savings.

WHAT ODOUR? – Foaming Fragrant Carpet Refresher

WHAT ODOUR? is a specially blended carpet refresher that deodorizes carpets; as well as drapes, bedspreads, vehicle interiors, upholstery and much more. Synergistic odour counteractants combined with a re-odourizing and refreshing bouquet fragrance leaves rooms smelling fresh and clean. The non-staining aerosol spray-foam identifies where WHAT ODOUR? has been applied, and then dissipates rapidly into the fiber surface within seconds depending on the amount sprayed. The inverted fan spray valve allows for both easy applications from a standing position as well as access to confined spaces. One can treat 500 to 1000 square feet (46.45 to 92.9 square meters), depending on application. WHAT ODOUR? leaves no sticky residue that might attract dust and dirt. Dries completely. Will not damage stain-resistant treated carpets. Ideal companion product to WHAT SPOT? Spot and Stain Remover.

WHAT SPOT? – Spotter for Carpet & Upholstery

Just hold the can in inverted (upside down) position, while standing, and apply the jet stream spray to the spots or stains and watch them disappear. WHAT SPOT? is effective on both water and oil based stains. Most stains are quickly removed without rubbing, scrubbing or other mechanical agitation. Leaves no unsightly residue and will not soften carpet backing, padding or upholstery cushions. Use as a prespotter prior to shampooing and especially prior to steam extraction since stains can become set after extraction. Available in liters.

HOT TANK DEGREASERS AND STRIPPERS

GANGWAY – Aluminum Cleaner for Jet Spray Washers

A powerful, nonfoaming, noncaustic powder designed to clean aluminum within the demanding requirements of jet spray washers. Jet spray washers were introduced to incorporate speed, cleanliness, energy efficiency and cost savings into spray cleaning. GANGWAY is a major part of this system. GANGWAY is effective in removing oil, grease, varnish, baked on sludge, mud, carbon and dirt; yet not attack aluminum. An efficient built-in rinse additive “wets-out” water to give a sheeting effect to allow for better and faster rinsing.

MARTEX – Heavy Duty Powdered Cleaner

A hot soak tank cleaner formulated to effectively and easily remove rust, ink, adhesive, heat treat scale, carbon, smut, paint, enamels, phosphate coatings, oils and other foreign deposits. MARTEX is a blend of penetrating agents and activators which soften, penetrate and break the bond between the surface to be cleaned and the coating to be removed. MARTEX readily dilutes with water. MARTEX is designed to chemically strip ferrous metals.

Cantol

Industrial and Specialty Chemicals

DRAIN TREATMENT CHEMICALS

BIO-DRAIN – Liquid Bacteria, Odour Control and Organic Solvent

A liquid bacteria/enzyme culture that contains a balanced blend of several natural strains of aerobic and anaerobic high enzyme producing bacteria which are nonpathogenic (non-harmful) and non-toxic; plus a powerful deodorant and biodegradable organic solvent. The ready-to-use 100% active bacteria, when introduced into a waste system, revive, feed, reproduce and generate high amounts of enzymes in the form of Amylase, Protease and Lipase, that digest organic waste matter. A hard working deodorant controls even the toughest waste odours. A biodegradable organic solvent is added to initially help liquefy organic waste. BIO-DRAIN breaks down protein, grease, fats, sugars, starches and other organic waste; thus reducing solids and BOD (Biological Oxygen Demand). Manual and automatic feeding devices are available to dispense BIO-DRAIN. USDA, Agr. Can. Approved.

DRAIN DEVIL – Liquid Drain Treatment

A fully inhibited heavier than water liquid drain treatment containing virgin sulphuric acid to quickly dissolve all organic obstructions: grease, hair, sanitary napkins, rags, sludge, soap, paper, coffee grounds. DRAIN DEVIL is designed to prevent and eliminate blockages and slow water flow in drains, sinks, urinals and toilets. Packed with child-proof cap, plastic safety cover and in a heavy duty plastic bottle for safety. USDA, Agr. Can. Approved.

DEVIL'S ONE SHOT – Liquid Drain Opener with Odour Blanket

DEVIL'S ONE SHOT combines Cantol's Drain Devil, an inhibited heavier than water liquid drain treatment containing virgin sulfuric acid, with an odour blanket to reduce exposure to undesirable odours. The blanket floats on top to help "trap" odours in the drain. The content of the half liter bottle is divided into two layers. When the entire contents of the bottle is added into the drain, the lower layer Drain Devil goes directly to the clog to quickly dissolve all organic obstructions including grease, hair, sanitary napkins, rags, sludge, soap, paper and coffee grounds. While the upper layer floats on top to reduce foul odours. DEVIL'S ONE SHOT is ideal for use in occupied buildings or other areas where odour reduction is desired. DEVIL'S ONE SHOT is designed to prevent and eliminate blockages and slow water flow in drains, sinks, urinals and toilets. DEVIL'S ONE SHOT will not harm septic tank activity when used according to directions. DEVIL'S ONE SHOT is the ideal single application drain treatment package to keep drains running free, that saves time, labour, costly plumbing bills while trapping troublesome odours.

EZE-FLO – Fumeless Alkaline Liquid Drain Opener and Cleaner

Attacks clogged drains without producing a back-up foul odour. The fast-acting, ready-to-use, alkaline liquid will remove obstructions due to grease, hair, vegetation, rags, paper and other organic matter. Heavier than water to go directly to the stoppage. The fumeless action makes it ideal for use in hospitals, schools and other sensitive environments. Harmless to all plumbing. USDA, Agr. Can. Approved.

ORA-SOLV PLUS – Dissolves Grease and Controls Odours in Grease Traps and Drains

Biodegradable solvents and emulsifiers chemically combine to effectively dissolve grease, fat, oil, slime and soap scum in drains, pipes and grease traps. A natural citrus based solvent replaces masking perfumes to give a fresh orange grove aroma while dissolving grease residues. Mixes with water to give a uniform, economical solvent system. Will not harm metal pipes, generate heat or affect bacterial activity. It is non-acid and non-caustic and may be used without fear of contaminating the environment or contributing to hazardous working conditions. USDA, Agr. Can. Approved.

OTROL-W – Liquid Treatment & Odour Control for Grease Traps, Drains & Sewage Areas

A formulated blend of chemicals consisting of emulsifiable solvents and solublizers for treating grease, fats, detergents, scum and sludge. OTROL-W breaks down greases and fats into emulsifiable particles to permit easy flush out with cold water. OTROL-W digests and liquefies all normal sewage wastes while effectively controlling odours. USDA, Agr. Can. Approved.

BOWL CLEANERS

BOWLITE – Liquid Bowl Cleaner

BOWLITE is an emulsion liquid bowl cleaner and delimer that cleans and sanitizes toilet bowls and urinals. BOWLITE has a powerful cleaning action that will not harm plumbing. It is a strong combination of inorganic acid and cleaning agents to effectively remove hard water deposits, uric acid deposits and rust stains; typical soils found in these areas. PCP, Agr. Can. Approved.

GENTS – Urinal Cleaner, Deodorizer and Water Conditioner

Helps keep urinals clean and free of obnoxious odours with each flush of water. GENTS softens or conditions incoming water to reduce hard water scale build up; releases detergents to help reduce soil accumulations; maintains free-flowing drains between periodic cleanings and releases a pleasant fragrance to neutralize foul odours while enhancing the restroom environment. Lasts up to 30 days under normal conditions. This urinal system comes in a self-contained disposable screen which is easily removed when GENTS is completely dissolved.

SNAP-STICK – Deodorizes & Conditions Water in Toilet Bowls

SNAP-STICK helps keep toilet bowls free of unpleasant odours with each flush of water. The technology used in SNAP-STICK makes obsolete paradichlorobenzene hangers, drip systems and other masking attempts which work continuously; even when toilets are not used. The problem of unpleasant odours in toilet bowls comes from waste odour, soil accumulation and hard water scale build-up which becomes a breeding ground for bacteria. Cantol bowl cleaners are the best products to clean the sides of the bowl and under the rim on a regular maintenance program. SNAP-STICK helps to control odours between periodic cleaning. It does this, when needed, with each flush of water. With each flush of water, SNAP-STICK softens or conditions incoming bowl water to help reduce hard water deposits and releases a pleasant fragrance to neutralize foul odours. SNAP-STICK contains some detergency to assist in the reduction of soil build-up. A colour indicator is formulated into each SNAP-STICK. The light blue colour of the bowl water indicates that SNAP-STICK is working to deodorize and condition the water. SNAP-STICK provides at least 30 days of automatic protection under normal conditions. SNAP-STICK comes in a self-contained, flexible, disposable holder which is designed to snap on to the rim of all toilet bowls. SNAP-STICK's compact holder fits neatly under the rim. The water deflecting panels of the holder ensures uniform water flow over SNAP-STICK with each flush. The holder is easily removed and disposed of when completely dissolved. Use SNAP-STICK as part of your rest room maintenance program.

Cantol

Industrial and Specialty Chemicals

SOLVENT CLEANERS, DEGREASERS & STRIPPERS

SOLVENT CLEANERS & DEGREASERS

AUTO-SOLV – Engine Cleaner and Degreaser

A concentrated engine cleaner chemically formulated to give a fast and efficient method of degreasing engines, engine parts, chassis and all under-hood parts. Contains a blend of effective solvents to break down grease, oil, dirt and road grime. A nonalkaline, nonacid cleaner formulated with a high degree of emulsifiers, penetrants and wetting agents to assist the solvent action and allow AUTO SOLV to penetrate soil quickly and efficiently. Water rinseable and can be diluted with kerosene or mineral spirits for light cleaning.

SOLVENT K – Multi-Purpose Parts Cleaner

A mild odour solvent designed and formulated for the fast, efficient, degreasing of various types of metal parts. Used in numerous applications such as brushing, dipping, wiping, hand spraying or as an exceptional parts washer solvent. It has a higher flash point than most commonly used solvents for parts washing. SOLVENT K is almost odourless and is water rinsable. USDA.

SAFETY SOLVENTS

J-88 – Safety Solvent

A ready to use, nonflammable safety solvent cleaner and degreaser. Designed for the spray cleaning of electrical and mechanical equipment where grease, oils, lubricants and other contaminants can reduce the efficiency of the equipment. The fast evaporation rate is controlled to allow for the flushing of insoluble matter and the dissolving of soluble soils. Leaves no residue. Has no flash point. Can be used without turning off motors or electrical equipment or disassembling mechanical equipment. Nonconductive to 36,200 volts. Agr. Can. Approved.

SOY-SOLV – Bio-based Cleaning Solvent

SOY-SOLV is a natural, industrial strength cleaning solvent made from 100% pure soybean oil. SOY-SOLV is a safe, plant derived, and therefore bio-based, solvent degreaser. The non-flammable aerosol is the perfect biodegradable solvent cleaning solution. SOY-SOLV leaves no residue when rinsed with water. No harsh odour or vapours. Quickly cleans industrial parts and equipment. SOY-SOLV contains no water, terpenes, citrus oil or petroleum solvent. Its cleaning power is derived from a renewable American-grown resource, soybeans. Its cleaning action penetrates, dissolves and lifts away grime and grease. The plastic safe formulation has controlled evaporation with extended contact time for increased cleaning power. Super low VOC's ensures a quality environment. SOY-SOLV is nonconductive and is safe for use on energized equipment. Choose the next generation of solvent cleaning that is safe and effective.

TECH SOLV – Solvent Cleaner

A balanced combination of solvents designed to effectively remove oil, grease, tar, adhesive, wax, lubricating compounds, dirt and dust from electric motors, machinery, gauges, machine parts, equipment and instruments. Restores efficiency to electric motors and mechanical equipment. Nonconductive to 25,000 volts to provide a broad use range on electrical equipment, running motors, and machinery. USDA, Agr. Can. Approved.

TRI-SUB LIQUID DEGREASER – Environmentally Responsible Safety Solvent

A replacement for 1,1,1-Trichloroethane without any of the environmental hazards. It is an important breakthrough in the degreasing of all parts quickly and easily; in most cases without disassembly. Highly effective in degreasing both mechanical and electrical equipment. Does not affect conductivity, leaves no residue, is nonflammable and has no harsh or strong odours. Has a dielectric strength of 36,000 volts and is used on a variety of surfaces and soils. Available as a liquid or as a convenient aerosol. USDA, Agr. Can. Approved.

TRONIC-2 – Electrical Contact Cleaner

A specialized aerosol cleaner and degreaser for electrical components, contacts, instruments, precision machinery and other electrical and mechanical operations. Has selective solvent power because it will dissolve and flush away the contaminants with virtually no effect on metal, most plastics, insulating coatings or elastomers. Dissolves and flushes away insulating contaminants such as grease, dust, dirt, flux, oil and other organic soils. Contains no TF Solvent and is nonchlorinated. While advanced in performance and ozone safety, this product is flammable and must therefore be used only on de-energized components and equipment. Always allow to dry and evacuate fumes before power is returned. USDA.

TRONIC NF – Fast Drying, Nonflammable Electrical Contact Cleaner

A fast drying, nonflammable aerosol cleaner and degreaser for electrical components, contacts, instruments, precision machinery and other electrical and mechanical operations. Dissolves and flushes away insulating contaminants such as grease, dust, dirt, flux, oil and other organic soils without any long evaporation time. The no odour, high purity solvent leaves no residue and is harmless to many plastic components. **TRONIC NF** has no flash point, is nonconductive and noncorrosive and may be sprayed into “live” circuits. Contains no TF Solvent, petroleum distillates, or chlorinated solvents. USDA.

STRIPPERS: PAINT, SEALANTS, COATINGS

GAT – Removes Graffiti, Grease, Asphalt, Tar and other Stubborn Soils

A blend of powerful, biodegradable cleaning solvents. The thick, gel-type cleaner dissolves and removes graffiti, grease, asphalt, tar, oil, dirt, tire marks and other stubborn soils. Surfaces are cleaned without the need for chlorinated solvents or petroleum distillates. The longer GAT works, the more it cleans. GAT is water emulsifiable and easily flushed off; or it can be wiped off with a rag. The heavy duty, industrial strength product is the fastest, easiest and cleanest way to remove graffiti and degrease surfaces without the need for environmentally troublesome solvents. USDA.

STRIP-EZE – Liquid or Gel – Paint and Sealant Stripper

A heavy duty, fast acting, bond releasing industrial stripper formulated to soften, penetrate and remove paint, varnish and sealers. Use on metal, concrete, wood, brick, cinder block, terrazzo and similar types of hard surfaces. Available in liquid form as well as gel which enables it to cling to vertical surfaces. STRIP-EZE is nonflammable and noncorrosive. Powerful penetrating agents cut through multiple layers of aged coatings. USDA.

Cantol

Industrial and Specialty Chemicals

ODOUR CONTROL

BLANKET – Floating Degreaser and Deodorizer

Specifically designed to help liquefy grease balls, grease matte, and reduce grease build up on the surface, walls and float of sewage treatment vessels. In addition, powerful deodorizing agents help to overcome and control offensive odours associated with sewage treatment facilities. A blanket of floating degreaser and deodorizer moves up and down with the flow of sewage; thus ensuring continuous contact to help eliminate grease accumulations on the surface and walls of sewage vessels. It provides continuous deodorization by suppressing sulfide formations and neutralizing odours both in the air and at the source. Apply into pumping stations, wet wells, lift stations, holding tanks and other similar vessels.

DEO-SORB – Granular Odour Control and Air Freshener

Absorbs foul odours and chemically neutralizes the odour in the air and at the source. The pleasantly scented granular controls odours associated with smoke, rubbish, decomposition and decay. It is noncaustic, noncorrosive and nonflammable. Regular and Honeysuckle scent. USDA.

ELIMINATOR – Concentrated Odour Control

A combination of 12 refined natural and synthetic oils blended into a special synergistic liquid with odour neutralizing and destroying catalytic effect. Formulated for continuous control of odour problems from such bad odours as urine, feces, decaying food, garbage areas, waste/sewage areas, sick rooms and body odour. ELIMINATOR's wick adjustment allows easy control of the amount used. The two ounce bottle of ELIMINATOR is the silent worker providing around the clock protection neutralizing all types of obnoxious odours for 120 days minimum. USDA, Agr. Can. Approved.

HEX – Cleaner and Deodorizer for overcoming odour causing bacteria

A concentrated blend of synthetic detergents, quaternary ammonium compounds and deodorizing agents. Cleans and controls odours in one operation. Leaves a fresh pleasant aroma. Specially designed to remove grease, slime, dirt, sludge and fat while overcoming odour causing bacteria at the source. Regular use of HEX will keep the area clean and fresh smelling. USDA, Agr. Can. Approved, DIN.

JUST SQUIRT – Surface and Air Deodorizer

A concentrated, viscous liquid odour suppressant and deodorizer. A small amount overpowers unpleasant odours and leaves behind a clean scent. A water base chemical formulation that is ready to use, or can be added to water and applied as a mist through a trigger sprayer or mechanical fogger. Overcomes objectionable odours in three ways: eliminates foul odours through a neutralizing fragrance; deactivates the source of odours with a powerful odour inhibitor; and leaves a fresh, pleasant scent that replaces the foul odour. Comes in convenient liter containers with a controllable "squirt" spout. Used anywhere unpleasant odours linger. Regular and Honeysuckle scent. USDA, Agr. Can. Approved.

ORA-FRESH SPRAY – Concentrated Natural Odour Eliminator

A ready-to-use concentrated natural citrus deodorant which overcomes and neutralizes the toughest unpleasant airborne odours. Leaves a natural, clean, fresh fragrance reminiscent of a walk through an orange grove. The orange technology uses natural ingredients to destroy any foul odours. An environmentally responsible departure from the typical solvent based deodorants. One concentrated burst can last up to 24 hours. The versatility is demonstrated by its ability to be sprayed into air, onto the source of odour or into hard surface cleaning solutions or carpet shampoos. Use the power and effectiveness of 100% citrus to turn stale, obnoxious indoor air outside-fresh. USDA, Agr. Can. Approved.

PINE ODOUR – Liquid Cleaner and Deodorant

PINE ODOUR is a quaternary (“Quat”) cleaner and deodorant containing pine oil. The versatile liquid is designed to clean and deodorize in one labor saving operation. PINE ODOUR deodorizes at the source with a powerful quaternary compound while leaving a pleasant and fragrant odour of pine which is noticeable for several hours after use. PINE ODOUR achieves excellent cleaning effectiveness through the use of a powerful detergent, “Quat” and pine oil. Dirt is held in suspension until rinsed away. Use PINE ODOUR to effectively control odours and freshen the air while cleaning.

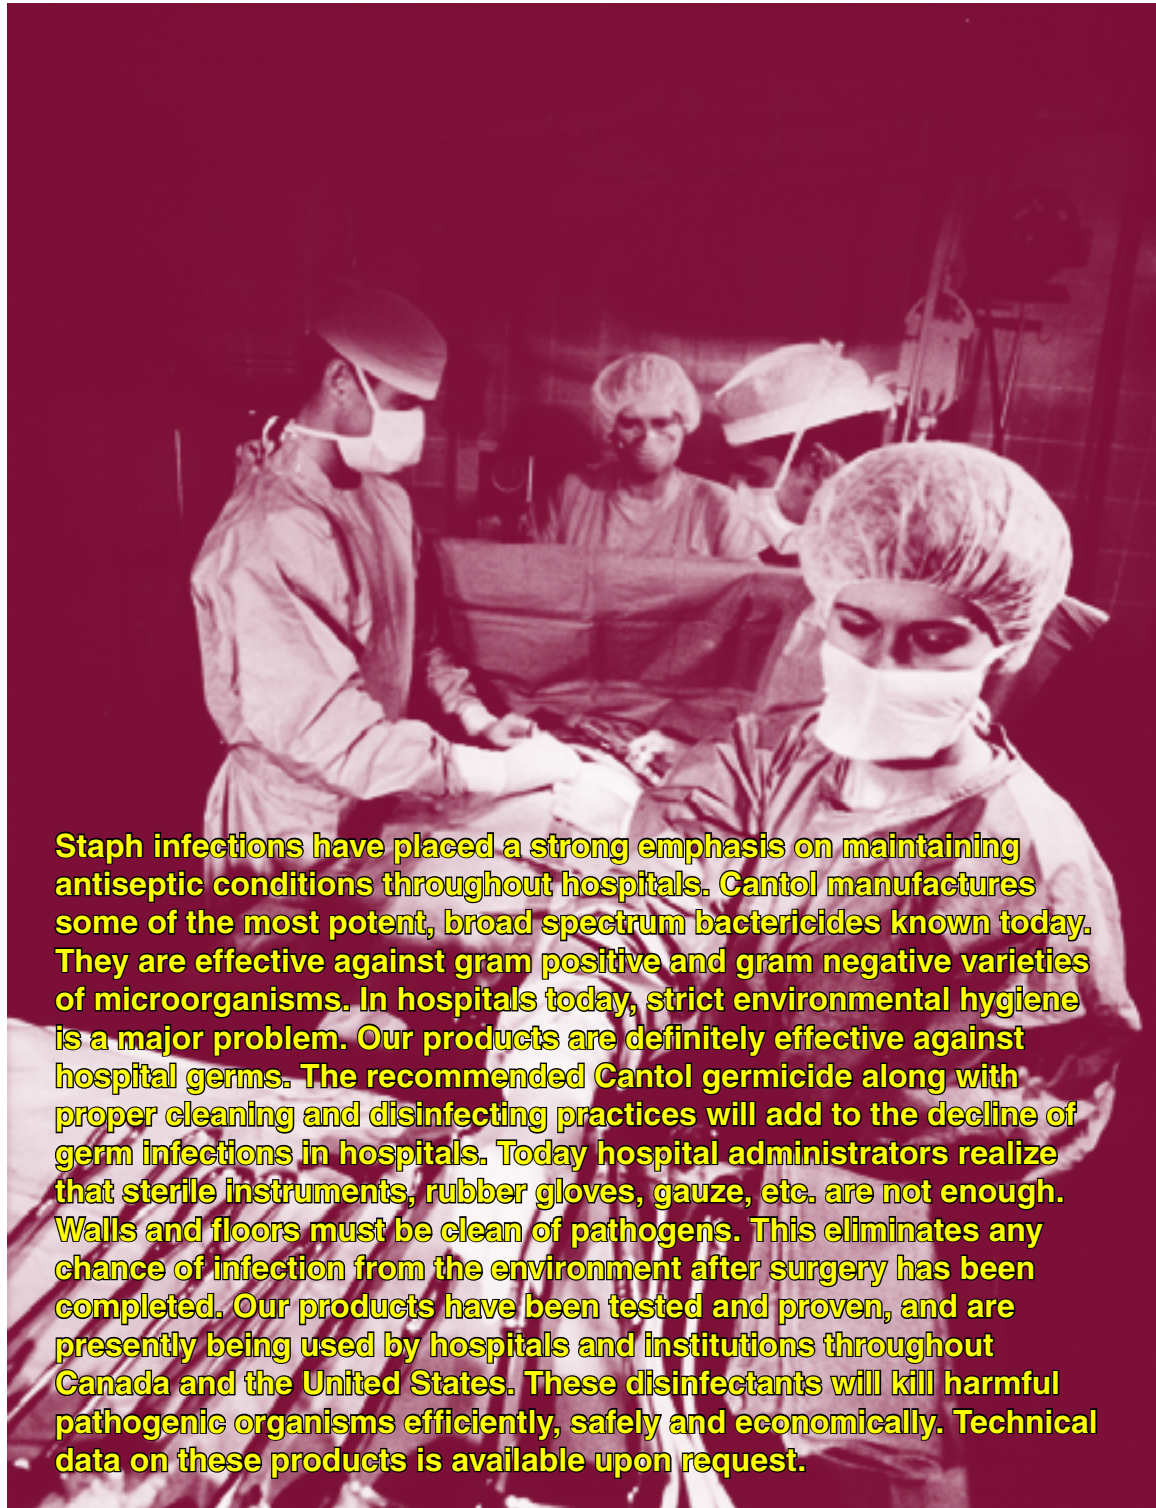

POMME – Natural Apple Scent Air Neutralizer & Deodorant

POMME is an instant-acting, nonstaining and due to its concentration, effective over long periods of time. Easily dispensed from a liter bottle equipped with a high delivery trigger sprayer. For large areas, POMME can be diluted with up to 5 parts water and applied through a mechanical fogger. POMME will leave areas with the fresh scent of delicious apples – reminiscent of a walk through an apple orchard. USDA, Agr. Can. Approved.

Cantol

Industrial and Specialty Chemicals

GERMICIDAL CLEANERS & DISINFECTANTS

Staph infections have placed a strong emphasis on maintaining antiseptic conditions throughout hospitals. Cantol manufactures some of the most potent, broad spectrum bactericides known today. They are effective against gram positive and gram negative varieties of microorganisms. In hospitals today, strict environmental hygiene is a major problem. Our products are definitely effective against hospital germs. The recommended Cantol germicide along with proper cleaning and disinfecting practices will add to the decline of germ infections in hospitals. Today hospital administrators realize that sterile instruments, rubber gloves, gauze, etc. are not enough. Walls and floors must be clean of pathogens. This eliminates any chance of infection from the environment after surgery has been completed. Our products have been tested and proven, and are presently being used by hospitals and institutions throughout Canada and the United States. These disinfectants will kill harmful pathogenic organisms efficiently, safely and economically. Technical data on these products is available upon request.

GERMICIDAL CLEANERS AND DISINFECTANTS

HEX – Cleaner, Disinfectant and Deodorizer

A concentrated blend of biodegradable detergents, germicides and deodorizing agents. Triple action product is specially designed to remove grease, slime, dirt, sludge and fat while eliminating odour causing bacteria at the source. Leaves a fresh, pleasant aroma. Regular use of HEX will keep the area clean and fresh. DIN, Agr. Can. Approved, USDA.

PINE ODOUR – Liquid Cleaner and Deodorant

PINE ODOUR is a quaternary (“Quat”) cleaner and deodorant containing pine oil. The versatile liquid is designed to clean and deodorize in one labor saving operation. **PINE ODOUR** deodorizes at the source with a powerful quaternary compound while leaving a pleasant and fragrant odour of pine which is noticeable for several hours after use. **PINE ODOUR** achieves excellent cleaning effectiveness through the use of a powerful detergent, “Quat” and pine oil. Dirt is held in suspension until rinsed away. Use **PINE ODOUR** to effectively control odours and freshen the air while cleaning.

SEELECT A-M 256 – Hospital Disinfectant, Cleaner, Sanitizer, Fungicide, Mildewstat, Virucide and Deodorizer

A super concentrated, (dilutable at 1 to 256) odourless, “one-step”, quaternary (Quat) hospital disinfectant, cleaner, sanitizer, fungicide, mildewstat, virucide (including the AIDS virus), and deodorizer. Effective in 5% serum contamination and 400 PPM hard water tolerance. Kills Herpes Simplex I and II. Kills athlete’s foot fungus. Controls mold and mildew. Economical sanitizer at dilution of 1 to 1408. SEELECT A-M 256 is the “one-step” super concentrated, hospital grade germicidal cleaner for all washable surfaces. Packaged in an innovative, one quart plastic bottle with a measuring chamber that accurately measures and dispenses the required amount of SEELECT A-M 256. EPA, PCP, USDA, DIN, Agr. Can. Approved.

FLOOR TREATMENT

MAINTENANCE/REPAIRS

CANTOL 110 REGULAR MORTAR

CANTOL 110 REGULAR MORTAR is a three component 100% solids epoxy mortar designed for applications where excellent wear characteristics and strength are required.

FORGE CRACK & JOINT FILLER – Pourable Epoxy Sealer Kit

A pourable epoxy sealer that fills and seals to keep out dirt and water, yet is flexible enough to accommodate traffic movement and changes in temperature. The 100% epoxy filler outperforms rigid epoxies, epoxy-urethanes and flexible caulks. The tenacious bonding strength ensures a long lasting trouble free repair. The kit contains pre-measured, 24 oz. cans with the proper ratio of base to hardener, stirring paddle, measuring cup and application bottles. Each kit covers approximately 65-75 linear feet of ½" x ½" joint. USDA.

FORGE C-CURE EPOXY FLOOR PATCH KIT – For Repairs of Epoxy/Concrete Mortar Flooring

A professional, heavy duty, industrial three part epoxy mortar system. The liquids A and B are combined with factory blended aggregates (Part C) to form a trowelable mortar patch. A general-purpose industrial patch that resists a wide range of chemicals: acids, alkalis, water, sugar, food stuffs. Ideal to patch or repair existing epoxy flooring or concrete. Has a 30 minute pot life. Patch can be opened to full traffic in 24 hours. Each kit makes 2½ gallons of mortar to give 20 sq. ft. at ¼". USDA.

SEALERS

PRE-SEAL – Base Coat Floor Sealer Without Zinc

A water-based chemical combination of acrylic polymers designed to protect and restore the surface of composition floors. Fills in small openings in porous surfaces or in worn flooring sealing out dirt, stains, moisture and tracked-in soils. Provides a highly detergent resistant, crystal clear, long wearing, tough undercoating for floor finish or floor wax. Designed for asphalt, vinyl, vinyl asbestos, rubber, linoleum, terrazzo, concrete, marble and other mineral rock floors.

FINISHES

ACRYMET “PLUS” – Deep Gloss Floor Finish

A prime example of continuous efforts to improve ultra high speed technology. With ACRYMET “PLUS” comes the most tolerant floor finish ever developed. Gives an initial high, deep gloss without buffing and keeps the busiest floor beautiful at any maintenance machine speed. That is, ACRYMET “PLUS” can be maintained by spray buffing, high speed buffing, or ultra high speed (UHS) burnishing. The result is a spectacular gloss and a finish that is toughened for maximum scuff-resistance. The unique polymer chemistry of ACRYMET “PLUS” extends floor finish life. Thus reducing labor costs since the number of strippings, recoats and spray maintenance procedures can be reduced. The advanced technology of this metal, crosslinked floor finish provides a clear, non-yellowing, anti-slip finish that resists black heel marks, scuffs, spills, powdering and heavy traffic. ACRYMET “PLUS” exceeds the demands of today’s maintenance industry.

OPTIMA “MOP-ON” MAINTAINER – Floor Maintainer for any Speed Buffing Ultra High to Low

OPTIMA “MOP-ON” MAINTAINER is specially designed as a rejuvenator for Cantol Floor Finishes. When used regularly, OPTIMA “MOP-ON” MAINTAINER will restore these floor finishes while adding restorative polymers to the floor film. OPTIMA “MOP-ON” MAINTAINER cleans and polishes out scuff marks when used as a routine maintainer between applications of additional floor finish. Helps to reduce labour when used for cleaning and buffing floors.

TACKLE – High Performance Floor Finish

TACKLE, high performance floor finish, is made for floors that can not be maintained every day, or every week, or even every month. TACKLE will keep floors looking great longer. It holds up even under the heaviest traffic, really extending the costly strip and re-coat cycle. And if you choose to give your floors an occasional spray buffing or “mop on” rejuvenator or UHS burnishing, TACKLE responds beautifully. TACKLE saves both time and money. Ideal for today’s budget conscious floor programs. TACKLE is specially formulated with exceptionally tough, acrylic polymers and goes on easy time after time, delivering a brilliant gloss, superior durability, and promised savings.

COATINGS

Cantol has a wide selection of specialized coatings to fit any floor type and purpose. The following is just a small sample of our more popular items. Please consult with your Representative for further information.

CANTOL100 – Two Component 100% Solids Epoxy Coating

The **CANTOL100** line of two component 100% solids epoxy floor coatings are advanced formulations based on high performance epoxy resins designed to provide superior functional and decorative properties. **CANTOL100** delivers an environmentally friendly, cost effective and superior protection for concrete floor coating in commercial, industrial and residential applications. **CANTOL100** increases the life of the substrate by providing high chemical resistance, high mechanical strength, excellent durability and adhesion while offering a beautiful porcelain like high gloss finish.

CANTOL 321 - 2 COMPONENT URETHANE

CANTOL 321 - 2 COMPONENT URETHANE is a two component polyester/aliphatic polyurethane floor sealer that exhibits excellent characteristics for abrasion resistance, chemical resistance, flexibility, weathering and UV stability.

CANTOL 322 - 2 COMPONENT VOC COMPLIANT URETHANE

CANTOL 322 - VOC COMPLIANT URETHANE is a two component polyester/aliphatic polyurethane coating that exhibits excellent characteristics for abrasion resistance, chemical resistance, flexibility, weathering, and UV stability. This product meets the VOC requirements for the newly enacted VOC laws of New York, Pennsylvania, New Jersey, and other states as an industrial maintenance coating.

CANTOL 144 – CLEAR EPOXY PRIMER

CANTOL 144 - CLEAR EPOXY PRIMER is a two component solvent based epoxy coating that exhibits excellent characteristics for abrasion resistance, chemical resistance, and substrate penetration. This product is suitable as a primer for high build coatings and urethane or as a stand alone coating.

CANTOL 154 – EPOXY PRIMER

CANTOL 154 - EPOXY PRIMER is a two component solvent based metallic pigmented epoxy coating that exhibits excellent characteristics for abrasion resistance, chemical resistance, and substrate penetration. This product is suitable as a primer for high build coatings and urethane or as a stand-alone coating.

CANTOL 94 – GROUT SEALER 94

CANTOL 94 - GROUT SEALER 94 is a two component 100% solids epoxy system designed for application where a low build epoxy is needed to seal the surface of a previously placed epoxy mortar overlay system without changing the existing texture of the mortar. This product has outstanding wear resistance and superb chemical resistance.

CANTOL 707 – HIGH BUILD EPOXY

CANTOL 707 - HIGH BUILD EPOXY is a two component 100% solids epoxy colored coating designed for applications where a high build colorfast impact resistant floor is needed.

CANTOL 820 – OIL STOPPER

CANTOL 820 - OIL STOPPER is a two component solvent based epoxy coating that exhibits excellent characteristics for coating over petroleum based oil contaminated concrete. This product allows excellent substrate penetration which results in excellent adhesion and is an ideal primer for the oil contaminated concrete substrate.

CANTOL 137M – SEAMLESS EPOXY BINDER

CANTOL 137M - SEAMLESS EPOXY BINDER is a two component 100% solids epoxy broadcast coat that can be filled with marble chips and colored sand mixtures to provide an infinite array of color schemes or patterns.

CANTOL 015 – WATER BASED EPOXY PRIMER

CANTOL 015 - WATER BASED EPOXY PRIMER is a two component water based epoxy coating that exhibits excellent characteristics that rival solvent based products. CANTOL WATER BASED EPOXY PRIMER has superb chemical resistance, abrasion resistance, and substrate penetration.

COLOUR SEAL – Polyurethane Floor Coating for Interior-Exterior Concrete, Wood and Metal

An excellent polyurethane floor coating that dries to a tough, durable high gloss coating. The wear and weather resistant coating provides beauty and protection indoors or out. Use this superb finish to brighten, enliven and enhance work areas as well as highlight entrances and exits. Vastly superior to conventional type floor enamels. Resists heavy foot traffic, food acids, alcohol, cleaners, dirt, mud, grease and grime. Easily applied with brush, long-handled roller or spray equipment. Provides a light gray colour to floors that can be opened for traffic 24 hours after application. USDA.

CRYSTAL-CLEAR UPGRADE – Light Stable Urethane

A moisture curing urethane coating with excellent gloss retention as well as superior light stability. Does not darken the true colors of terrazzo nor does this tough, durable coating darken under long term exposure to light. Provides outstanding resistance to abrasion, water and chemicals such as acids, alkalis, solvents and oils. Highly recommended for transparent terrazzo finishes, but can also be used to coat concrete floors. Provides a high gloss that dramatically improves the appearance of the floor. Special low odour solvents permit applications where odours are objectionable. Can be recoated in approximately 3 hours. USDA.

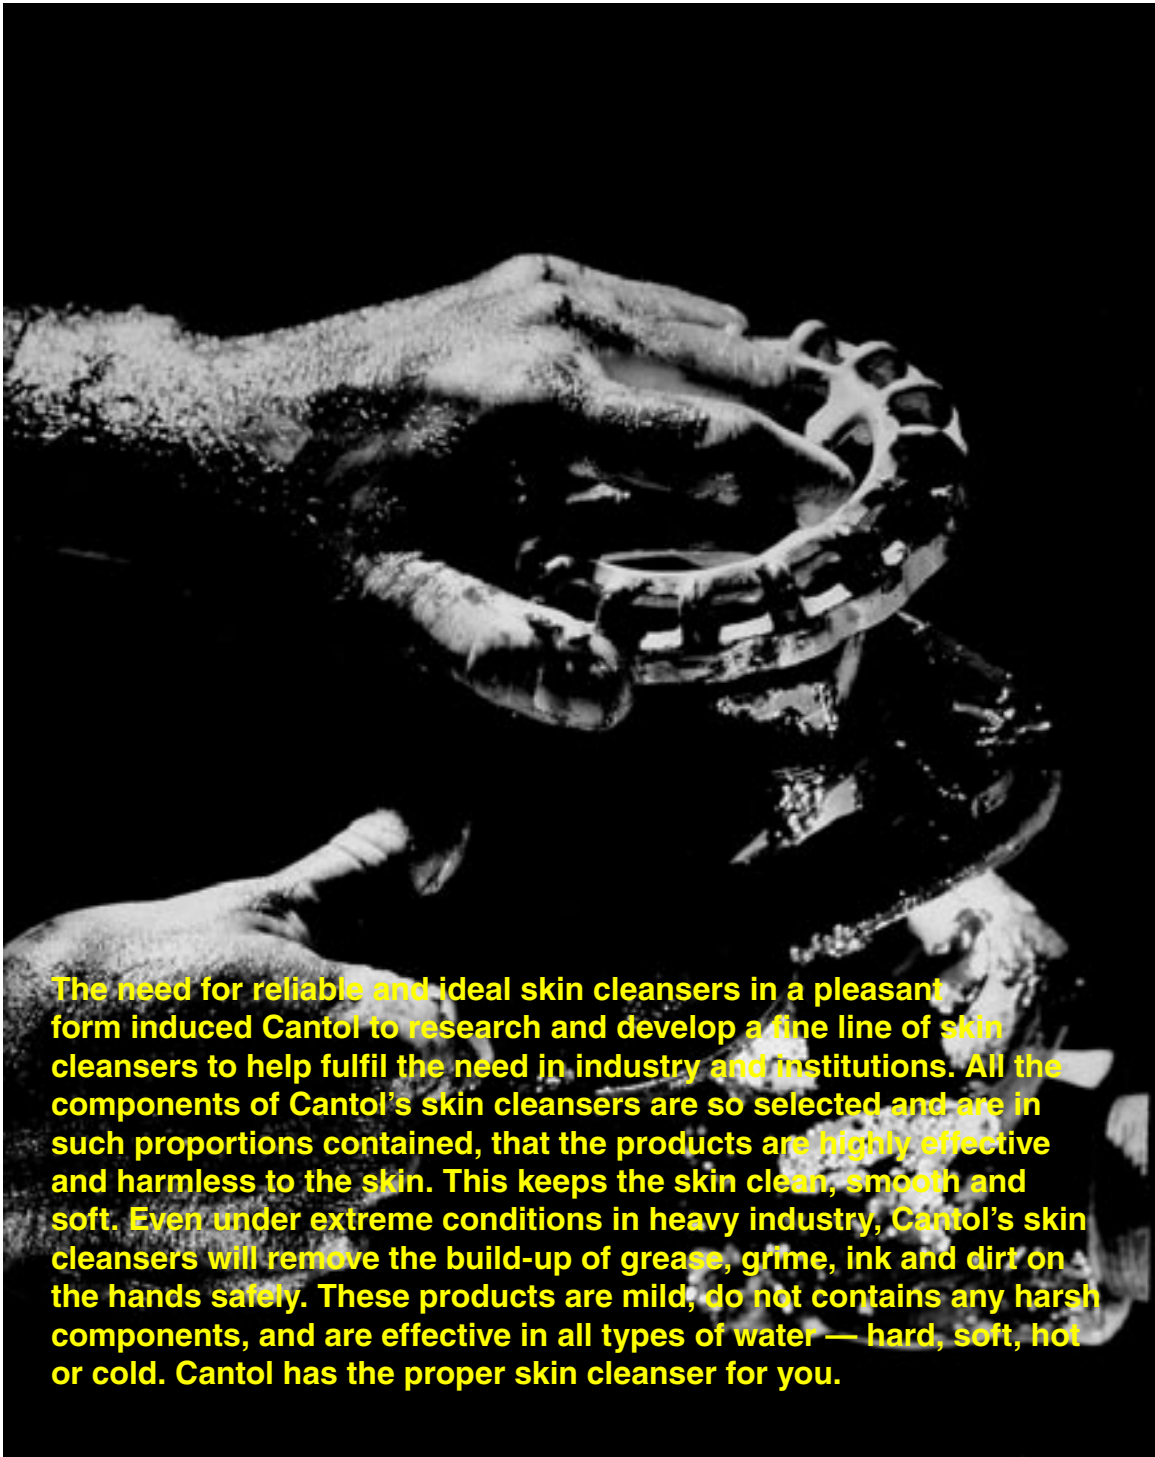

UPGRADE – Clear Urethane Coating

Dust formation is a problem with unprotected concrete floors and UPGRADE offers an ideal solution to that problem. It is a clear, high solids, moisture-cure, single component urethane coating. Provides a surface film with outstanding resistance to abrasion, water and chemicals such as acids, alkalis, solvents and oils. Dust, dirt and grease stay on top so maintenance is easy and quick. The tough, durable coating provides a high gloss to ensure optimum reflective light. May be recoated in three hours under normal conditions and opened to heavy usage after drying overnight. Special low odour solvents permit applications where strong odours are objectionable. Significantly outperforms conventional coatings. USDA, Agr. Can. Approved.

Cantol

Industrial and Specialty Chemicals

HAND CARE

The need for reliable and ideal skin cleansers in a pleasant form induced Cantol to research and develop a fine line of skin cleansers to help fulfil the need in industry and institutions. All the components of Cantol's skin cleansers are so selected and are in such proportions contained, that the products are highly effective and harmless to the skin. This keeps the skin clean, smooth and soft. Even under extreme conditions in heavy industry, Cantol's skin cleansers will remove the build-up of grease, grime, ink and dirt on the hands safely. These products are mild, do not contains any harsh components, and are effective in all types of water — hard, soft, hot or cold. Cantol has the proper skin cleanser for you.

AMBEROL – Refined pH Controlled Skin Cleanser

A concentrated pH controlled skin cleanser that is completely soap free. Manufactured with pure refined coconut oil, water softeners, wetting agents, emulsifiers and fortified with lanolin. AMBEROL leaves the skin soft, smooth, fresh and clean. Produces an abundance of rich, thick, luxurious lather. Free rinsing and can be diluted. Agr. Can. Approved.

HAND SANITIZING WIPES

Cantol Hand Sanitizing Wipes have been developed to immediately eliminate harmful microorganisms from skin. Premoistened with a powerful sanitizing formula, a single wipe kills 99.9% of disease-causing microbes. Plus, the special formula prevents crosscontamination and moisturizes skin while leaving a fresh wintergreen fragrance.

CREOTION PLUS – Lotionized Waterless Hand Cleansing Cream with Synthetic Scrubbers

A lotionized waterless hand cleansing cream with power activated synthetic scrubbers. The soft-edged particles act like small scrub brushes digging out and removing deeply embedded grease and grime. They provide the mechanical action necessary to remove such stubborn soil as carbon, ink, oil, grease, tar and asphalt. CREOTION PLUS is formulated to penetrate, suspend, liquefy and remove tough dirt without irritating solvents. Formulated with lanolin and allantoin and other emollients and humectants to give skin a natural supple feel without any sticky film. Cleans quickly and easily, with or without the use of water. USDA.

DELUXE LANAX – Powdered Hand Cleaner

Formulated with natural soap and borax that leaves the hands clean, soft and smooth. Refined vegetable oil soap develops a rich lather that absorbs soil and conditions the skin. The nonabrasive action of borax provides gentle penetration and thorough cleaning. USDA, Agr. Can. Approved.

GRIME FIGHTER – Invisible Skin Shield

A protective coating that acts like a glove to help guard workers' hands. The film barrier helps protect skin against irritation. Formulated with silicone for wet work; lanolin for conditioning; moisturizing agents to help prevent dryness; and a bacteria fighting ingredient. Use before work to make clean-up easier and at the end of the day to keep hands soft and conditioned.

PINK ANTISEPTIC HAND SOAP

An odourless hand cleaner containing coconut soap fortified with a powerful antiseptic agent. The natural soap quickly develops a rich lather that absorbs soil and conditions the skin. Reduces the chance of cross-infection. USDA.

ORA-CREAM HAND CLEANER – Waterless, Natural Orange, Pumice Fortified

Combines natural and citrus ingredients to offer the best in heavy duty waterless hand cleaning. The petroleum-free formulation contains deep scrubbing pumice for the removal of tough grease and grime. Contains lanolin which leaves the skin soft and conditioned. The fast cleaning, biodegradable formula thoroughly and safely cleans adhesive, asphalt, carbon, graphite, grease, paint, printer's ink, putty, tar and many more stubborn soils. Hands are left with a fresh orange scent. Comes with a pump dispenser for easy application with or without the use of water. USDA.

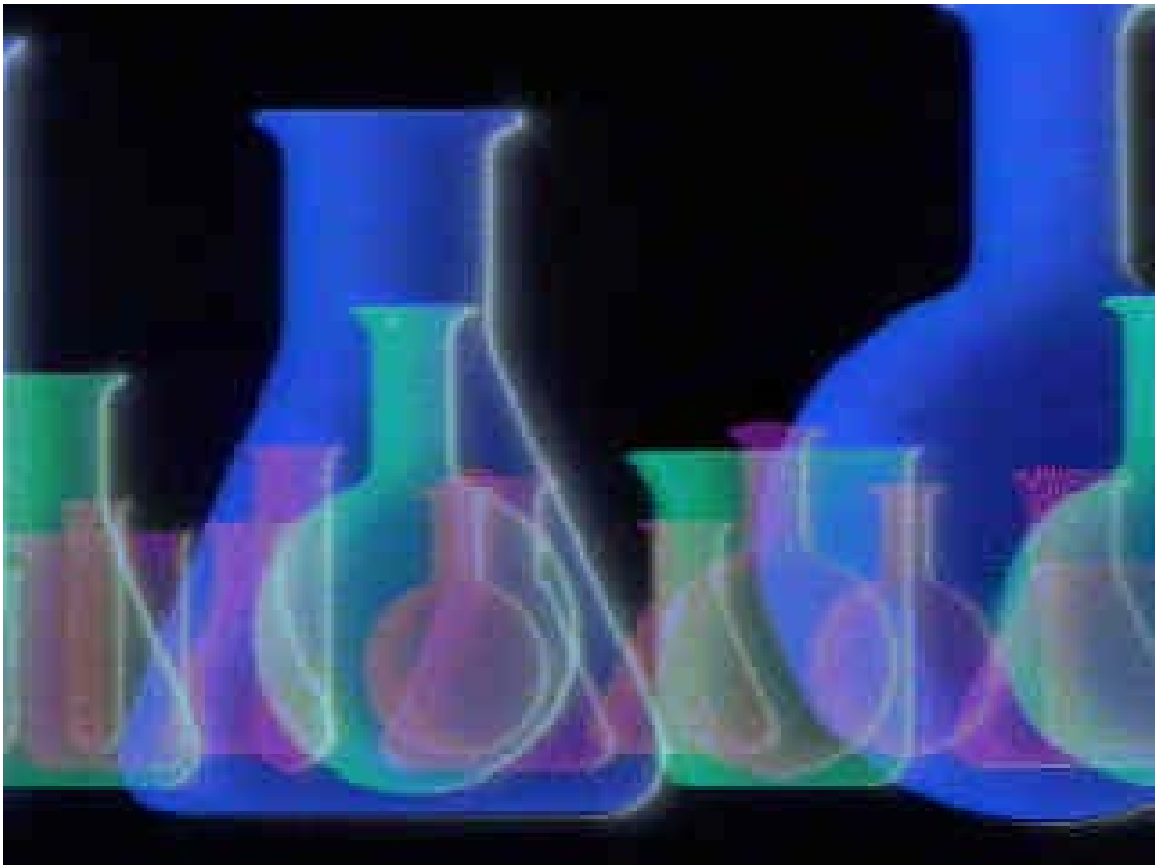

PUMPOW – Pumice Powdered Hand Cleaner

A heavy duty powdered hand cleaner with pumice, borax and refined vegetable oil soaps. The gentle abrasive action removes tough, stubborn, deeply embedded grease and grime including paint, ink, oil, rust and carbon. Develops a rich lather that absorbs soil and conditions the skin. Free rinsing and leaves the hands clean, soft and smooth. USDA, Agr. Can. Approved.

Cantol

Industrial and Specialty Chemicals

FOOD PROCESSING AND DIETARY CHEMICALS

DAVOL – Liquid Steam Cleaner

A heavy duty nonflammable, biodegradable, fast acting liquid whose cleaning power is released through steam. DAVOL penetrates and emulsifies grease, oil and dirt from all types of equipment and parts. DAVOL will not corrode or clog steam cleaning equipment. USDA, Agr. Can. Approved.

EF-90 – Biodegradable Heavy Duty Multipurpose Cleaner and Degreaser

A highly concentrated, heavy duty degreaser and cleaner which contains no solvents. The environmentally friendly formulation is without phosphates and is completely biodegradable. EF-90 is nonflammable, easily rinsed and safe on all surfaces when used according to directions. Quickly lifts oil, grease and other soils from metal and other hard and soft surfaces. USDA, Agr. Can. Approved.

TECH 300 P – Heavy Duty Alkaline Powder

A free flowing, nonfoaming, heavy duty powdered chemical blended with effective, cleaning agents. Removes heavy build up of grease, fat, oil, carbon and other tough food and pharmaceutical residues. Water softeners are added to control hard water deposits. Designed for use in CIP (clean-in-place) and COP (clean-out-of-place) systems: steam, pressure wash, spray and wash and soak methods of cleaning. USDA, Agr. Can. Approved.

KITCHEN MASTER POWDER – Automatic Dishwashing Cleaner

A powerful alkaline cleaner fortified with a chlorine compound to cut through stubborn soil deposits on dishes, glassware, utensils, pots and pans. The addition of chlorine in the grease and fat-removing formula is especially effective on protein soils and food stains. Effective rinse agents leave items sparkling and film free. The low foaming powder softens water as it quickly penetrates, lifts, emulsifies and dissolves food particles. USDA, Agr. Can. Approved.

ACID CLEANERS

TECH LA – Liquid Acid Cleaner

An odourless, low foaming liquid acid cleaner combined with emulsifiers and penetrants to work together for the rapid removal of milkstone, beerstone, hard water deposits, protein, scale, rust and dirt. Used in CIP (clean-in-place) as well as with COP (clean-out-of-place) systems. USDA, Agr. Can. Approved.

HAND SOAPS

PINK ANTISEPTIC HAND SOAP

An odourless hand cleaner containing coconut soap fortified with a powerful antiseptic agent. The natural soap quickly develops a rich lather that absorbs soil and conditions the skin. Reduces the chance of cross-infection. USDA.

SPECIALTY PRODUCTS

HI-BRITE – Metal Finish Maintainer

A nonflammable, lemon scented emulsion formulation specially designed to clean, polish and protect the original finish of metal surfaces (stainless steel, aluminum, brass, chrome, copper) and other hard washable surfaces (Formica, plastics, porcelain). HIBRITE easily removes, without abrasive agents, tough oil based stains, water spots, fingerprints, smudges, spills and food soils. HI-BRITE polishes as it cleans and leaves no greasy film. HIBRITE contains all edible ingredients which enables it to be used anywhere with confidence. USDA, Agr. Can. Approved.

ZINC-O-LUBE – White Multi-Purpose Grease

Ideal multi-purpose lubricating grease for use in areas where staining or discolouring is a problem. Contains zinc oxide which gives the grease a clean white colour. The stable No.2 grade grease is effective under heat conditions. Excellent work stability enables this grease to retain its consistency under many hours of lubrication; will not sag or separate. A tenacious grease that thoroughly “wets” all metals to provide a waterproof, anti-rust barrier. USDA, Agr. Can. Approved.

Cantol

Industrial and Specialty Chemicals

LUBRICATION

CANCOOL HD – Heavy Duty Emulsifiable Cutting Oil and Coolant

Stands up under the most severe conditions. The emulsifiable oil contains excellent additives for extreme pressure, anti-rust and oxidation inhibitors, anti-foam agent, wetting agent, detergent and a powerful bactericide. Stable through a pH range of 8-11 and temperature range of 35°F (2°C) to 190°F (88°C). Designed for metals having machinability ratings of 50% to 70%. An aid in cutting, drilling, grinding, turning, milling, metal washing, boring, reaming, tapping, threading, external broaching, trepanning and stamping. Highly resistant to the growth of bacteria which causes odours and skin irritation. Reduces the possibility of burning, checking and chattering.

CUT 'N COOL – Aerosol Coolant and Lubricant

CUT 'N COOL is a synthetic coolant and lubricant. The aerosol package is ideal for portable and field use. CUT 'N COOL is an aid in cutting, drilling, grinding, turning, milling, sawing, machining, punching, boring and threading. The metal working fluid is transparent to provide better visibility of work area and helps protect treated surface from corrosion. CUT 'N COOL is suitable to use on all steels, nonferrous metals and exotic metals such as monel, inconel and hastelloy alloys. Cantol CUT 'N COOL helps reduce the possibility of burning, checking, chattering and rusting. Reduces costly tool breakdown caused by inadequate lubrication and provides longer tool life. Will not gum or load grinding wheels. Use of CUT 'N COOL results in cooler work piece, less heat distortion, and increased production rates.

DRY GRAPH – Dry Graphite Lubricant

A synthetic processed graphite dry film lubricant which air dries rapidly at room temperature and adheres tenaciously to most surfaces with minimum surface preparation. Contains a dispersion of microscopically fine pure colloidal graphite, suspended in fast drying solvents and fortified with a rust inhibitor. Produces a smooth matte surface that reduces friction, heat and wear. Retards rust and corrosion while repelling lint, dust and dirt. Effective to 400°F (204°C) under constant temperature.

GEAR GLIDE

A heavy duty aerosol waterproof lubricant and protective coating for open gears, chain drives, cables and wire rope. Provides outstanding creeping and spreading ability to ensure against metal to metal contact. Forms an elastic adhesive coating that consistently and automatically coats and recoats with every revolution or movement of the lubricated metal part. Remains fully effective under water; under hot, 140°F (60°C), operating conditions since it will not drip or run off; under extreme cold since it will not chip or peel off; and under high pressure since it will not ball up or be forced out leaving unprotected metal.

INSTANT – “TRIPLE ACTION” – Penetrant, Lubricant, Moisture Expellant

INSTANT – “TRIPLE ACTION”, is an extremely fast acting lubricant and penetrant which quickly loosens rust and corroded frozen parts, prevents further rust and corrosion, displaces and seals out water and moisture on electrical and ignition systems. INSTANT – “TRIPLE ACTION” is formulated without chlorinated solvents, non-conductive, and harmless to most rubber, plastic and paint. Before re-assembling parts, spray with INSTANT – “TRIPLE ACTION”, making re-assembly easier and to help prevent binding, rusting and corrosion. INSTANT – “TRIPLE ACTION” saves downtime and costly repairs while keeping parts and equipment running smoother, longer and more efficiently.

INSTANT 4 Way – Penetrant, Lubricant, Moisture Displacement, Corrosion Inhibitor

A four-way action product that penetrates quickly to work itself into and free mechanical parts frozen by corrosion; leaves a film that reduces friction, stops squeaks and frees sticking parts; displaces and seals out moisture on electrical equipment to help prevent electrical shorts and current leakage caused by moisture. Agr. Can. Approved.

INSTANT-ER – Nonchlorinated Penetrant, Lubricant, Moisture Displacement, Corrosion Inhibitor

INSTANT-ER is a six-way action liquid product that 1) penetrates, 2) lubricates, 3) displaces moisture, 4) helps prevent corrosion, 5) protects surfaces and 6) cleans. As a penetrant, INSTANT-ER quickly works itself into mechanical parts frozen by corrosion. The lubricating oil leaves a film that reduces friction, stops squeaks and frees sticking parts. INSTANT-ER displaces and seals out moisture on electrical equipment to help prevent electrical shorts and current leakage caused by moisture. INSTANT-ER inhibits metal corrosion by adhering to wet or dry metal surfaces that are exposed to corrosive conditions. Helps protect electrical gear, metal and other surfaces from deterioration due to harsh environments. INSTANT-ER cleans surfaces to allow better penetration. INSTANT-ER is formulated without chlorinated solvents to be nonflammable, nonconductive and harmless to most rubber, plastics and paint. INSTANT-ER saves downtime and costly repairs while keeping parts and equipment running smoother, longer and more efficiently.

LAG – Liquid Aerosol Red Spray Grease with EP Additive

LAG is a general purpose lubrication system in an aerosol can. **LAG** sprays on as a penetrating liquid into machinery and equipment; lubricating and protecting even hard-to-reach areas. In a few minutes the liquid will gel and fully cure in approximately 20 minutes as a versatile high temperature (260°C/500°F) grease containing an extreme pressure (EP) additive. The lithium complex formulation of **LAG** enables it to perform under high loads without thinning out, thereby maintaining its excellent lubricating properties. Resists caking and hardening as a result of constant load or idle periods. **LAG** has superior mechanical stability and mobility even at low temperatures (-40°C/-40°F). The heavy duty formulation is designed to resist oxidation and rust proof metal surfaces while helping to prevent corrosion from acid, alkali and salt spray. **LAG** is impervious to moisture and will not wash out or weather away. Lubricates in the presence of water. Can be sprayed on any metal surface to lubricate and protect. Just shake, aim and spray using the handy extender tube to reach inaccessible places. **LAG** is an aerosol grease gun which changes from a fluid to a tough, protective grease having a distinctive colour that allows you to see where it is sprayed.

MAST LUBE – Lift Truck Mast Lubricant

A foamy gel lubricant spray applied from a convenient aerosol can. Designed to cling to vertical surfaces of a lift truck mast to provide continuous lubrication. Liquefies under pressure allowing the lubrication to penetrate into inaccessible areas thus reducing wear and extending equipment life. Prolongs life of the chain mechanism while providing rust and corrosion protection. Agr. Can. Approved.

PLEXOIL – Multi-Weight, Extreme Pressure Climbing Gear Lubricant

PLEXOIL is a multi-weight (multi-viscosity) polymer fortified climbing gear oil which provides maximum lubrication and protection for all mechanical transmissions, differentials and industrial gear boxes which would normally use an 85 to 140 weight gear oil. The lubricating oil will cling to all metal surfaces without drip-off or throw-off. Polymer fortification provides cohesive properties that cause PLEXOIL to climb up the moving gears and continuously coat and recoat all wear surfaces from the first revolution of the gears. PLEXOIL offers a single multi-graded lubricant that can be used year round in all climates. The nonemulsifying (water resistant) oil provides proper lubrication from 10°F (-12°C) to 260°F (126°C). PLEXOIL contains an extreme pressure additive to help prevent metal to metal contact even under heavy loads and shock loads that can cut through ordinary lubricant films. PLEXOIL's superior lubrication means lower friction and less heat build-up which can destroy seals and gaskets causing leaks. The effective anti-corrosion and anti-oxidation, chemical breakdown due to heat and air, systems provide significantly longer lubricant life which means lower labour and lubricant costs as well as less costly downtime. The modern formulation is free of chlorine and active sulfur compounds and will not cause discoloration of bronze gears in enclosed gear boxes. PLEXOIL is compatible with most gear oils and can be used on almost every type and design of enclosed gears.

SIL-X – Concentrated, Silicone Lubricant and Release Agent

Formulated to cut friction, repel water, help prevent rust and corrosion and is an excellent release agent on a wide variety of surfaces. A nonstaining, colorless and greaseless lubricant. Reduces friction and static electricity. Can be used inside or outside under a wide range of temperatures and atmospheric conditions. USDA, Agr. Can. Approved.

SIL-X FG AEROSOL – Food Grade (H1) Silicone Spray

A heat stable, non-staining, pure, dry silicone film that lubricates moving parts in food processing and packaging plants. Ideal for use on tables, conveyors, heat sealing and slicing equipment. Dry silicone formula prevents jamming and production slowdown on bottling and packaging lines. Can also be used on non-food contact surfaces of ovens and grills to prolong time between cleanings. USDA, Agr. Can. Approved, NSF Branded.

TECH-LUBE – Multi-Purpose Grease

A multi-purpose grease formulated for use where operating temperature ranges from -20°F (-28°C) up to 475°F (246°C). The stable No.2 consistency is fortified with an extreme pressure additive and both molybdenum disulfide and graphite solid lubricants for high pressure use under high heat conditions. Excellent work stability enables this grease to retain its consistency under many hours of working; will not sag or separate. A tenacious grease that thoroughly “wets” all metals to provide a waterproof, anti-rust barrier.

ZINC-O-LUBE – White Multi-Purpose Grease

Ideal multi-purpose lubricating grease for use in areas where staining or discoloring is a problem. Contains zinc oxide which gives the grease a clean white color. The stable No.2 grade grease is effective under heat conditions. Excellent work stability enables this grease to retain its consistency under many hours of lubrication; will not sag or separate. A tenacious grease that thoroughly “wets” all metals to provide a waterproof, anti-rust barrier. USDA, Agr. Can. Approved.

Cantol

Industrial and Specialty Chemicals

INSECTICIDES

CANTOL N.O. – No Odour, Water-Base Residual Aerosol Insecticide

A highly effective water-base, residual pressurized spray to kill flying and crawling insects. The powerful formulation contains an aggressive blend of active insecticide ingredients offering quick knockdown and residual kill of crawling insects for up to one month (4 weeks); without any characteristic insecticide odours. The no odour property of CANTOL N.O. ensures a wide acceptance by most establishments while the use of water as the carrier solvent is environmentally acceptable. A nonflammable spray that simplifies control of annoying and disease carrying insects. EPA, USDA, PCP

KLUNK – Contact Insect Killer

A concentrated space and contact insecticide spray formulated for fast knockdown. The powerful formula provides maximum control of both flying and crawling insects. Produces a fog spray that assures quick kill and effective control. PCP, Agr. Can. Approved.

WASP & HORNET SPRAY

A powerful, nonconductive, aerosol insecticide specially designed for the fast knockdown of wasps and hornets. The long spray pattern, up to ten feet, kills wasps and hornets from a safe distance. EPA, PCP.

THE CANTOL GUARANTEE

Cantol guarantees its products, when used as directed, to do all it claims. We will send, where practical, a representative to show how the product should be used and they will furnish any necessary directions. Should the product fail to demonstrate our claims, the remaining material may be returned to us and no charge will be made.
