NO SLUDGE

Fuel Oil Additive and Conditioner

DESCRIPTION

NO SLUDGE is a liquid chemical formulation designed to emulsify water and to disperse and control sludge formation in all fuels from No. 2 through Bunker C. Provides a more complete and regular combustion. Reduces soot deposits and cuts down corrosion. Increases burner efficiency. Harmless to tanks, lines and burner parts. Keeps strainers, burner tips, filters, oil lines and oil preheaters sludge free. Helps reduce viscosity of oil to provide for less restrictive flow. Helps reduce paraffin wax build up.
